

OBJECTIVE

Suturing is a basic ophthalmic surgical skill which is needed in most surgical procedures. Our comprehensive Suturing Course is designed to empower eye surgeons with the pivotal skill of suturing, applicable across all types of ophthalmic surgeries. No matter your area of specialization, learning to effectively suture a leaky tunnel is invaluable in managing critical complications such as perforations and tunnel wall lacerations.

Mastering this skill will allow surgeons to stabilize the eye, facilitating effective post-operative recovery. As suturing and restoring the eye is a crucial component of nearly every eye surgery procedure, we're here to help you hone this indispensable skill and enhance the overall quality of your surgical practice. Get ahead in your career with proficiency in comprehensive suturing techniques.

Course ideally suited for:

- Surgeons and practicing ophthalmologists seeking to improve their suturing skills.
- Surgeons who have completed the MSICS Simulation-based Training Course (MSTC), Phacoemulsification to MSICS Differences Course (PMDC), and Phacoemulsification Simulation-based Training Course (PSTC).
- Ophthalmology residents and fellows looking to advance their surgical capabilities.

The course is reserved for:

- Ophthalmology residents
- Practicing and senior ophthalmology surgeons
- Healthcare professionals authorized by their country to practice ophthalmology

DURATION

1 day

SUPERVISORS

Our simulation courses are led by certified instructors

TERMS

- Completion of a form to better know the participant's experience
- Access to e-book
- E-learning and/or pre-tests to be done before the on-site course
- No score is eliminatory
- Practical sessions on the simulator with assessments after each module
- Certificate of completion and satisfaction survey

ACCESSIBILITY

- Accessible premises and services adapted for people with disabilities. To take part in the courses, please contact the organisation's disability advisor

PEDAGOGY

- The training is participative, alternating theoretical classroom sessions with practical sessions on the simulator
- Course language: French and/or English
